A Methodology for the Evaluation of Road Accidents Health Care Costs for Powered Two-Wheelers: the Rome Case Study

Maria Vittoria Corazza

Antonio Musso

Kostas Finikopoulos

Veronica Sgarra

Department of Civil and Environmental Engineering - DICEA, Sapienza University of Rome, Via Eudossiana 18, 00184 Rome Italy

Highlights

- Health care costs for road safety victims are calculated according to different approaches.
- A case study on these costs for PTWs victims in Rome is proposed.
- The calculation approach is based on the Italian regulatory reference.
- The calculation of the Safety Potential index integrates this approach
