On the Influence of the Wall Friction Coefficient on Void Fraction Gradients in Horizontal Pneumatic Plug Conveying measured by Electrical Capacitance Tomography

C. Nied, J. Lindner, K. Sommer

PII: S0032-5910(17)30620-4
DOI: doi:[10.1016/j.powtec.2017.07.072](https://doi.org/10.1016/j.powtec.2017.07.072)
Reference: PTEC 12714

To appear in: *Powder Technology*

Received date: 24 January 2017
Revised date: 18 July 2017
Accepted date: 23 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**On the Influence of the Wall Friction Coefficient on Void Fraction
Gradients in Horizontal Pneumatic Plug Conveying measured by Electrical
Capacitance Tomography**
