On the significance of two-way coupling in simulation of turbulent particle agglomeration

Farzad F. Dizaji, Jeffrey S. Marshall

PII: S0032-5910(17)30402-3
DOI: doi:[10.1016/j.powtec.2017.05.027](https://doi.org/10.1016/j.powtec.2017.05.027)
Reference: PTEC 12553

To appear in: *Powder Technology*

Received date: 10 February 2017
Revised date: 3 May 2017
Accepted date: 14 May 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

On the Significance of Two-Way Coupling in Simulation of Turbulent Particle Agglomeration

Farzad F. Dizaji and Jeffrey S. Marshall
