This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Effect of air leakage on the hygrothermal performance of highly insulated wood frame walls: comparison of air leakage modelling methods

Lin Wang, Hua Ge*

Department of Building, Civil and Environmental Engineering, Concordia University, 1455 de Maisonneuve, Montreal, QC, H3G 1M8, Canada
