Human breath as a source of VOCs in the built environment, part II: Concentration levels, emission rates and factor analysis

Xiao Sun, Junzhou He, Xudong Yang

PII: S0360-1323(17)30295-0

DOI: [10.1016/j.buildenv.2017.07.009](https://doi.org/10.1016/j.buildenv.2017.07.009)

Reference: BAE 4988

To appear in: *Building and Environment*

Received Date: 6 November 2016

Revised Date: 6 July 2017

Accepted Date: 7 July 2017

Please cite this article as: Sun X, He J, Yang X, Human breath as a source of VOCs in the built environment, part II: Concentration levels, emission rates and factor analysis, *Building and Environment* (2017), doi: 10.1016/j.buildenv.2017.07.009.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Human breath as a source of VOCs in the built environment,**
2 **Part II: Concentration levels, emission rates and factor**
3 **analysis**
