

## Accepted Manuscript

Best Theory Diagrams for Cross-Ply Composite Plates using Polynomial, Trigonometric and Exponential Thickness Expansions

J. Yarasca, J.L. Mantari, M. Petrolo, E. Carrera

PII: S0263-8223(16)31912-2

DOI: <http://dx.doi.org/10.1016/j.compstruct.2016.11.053>

Reference: COST 8013

To appear in: *Composite Structures*

Received Date: 20 September 2016

Revised Date: 14 November 2016

Accepted Date: 16 November 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Best Theory Diagrams for Cross-Ply Composite Plates using  
Polynomial, Trigonometric and Exponential Thickness Expansions**
