Title: Numerical study on impact of non-heating surface temperature on the heat output of radiant floor heating system

Authors: Xuejing Zheng, Yong Han, Huan Zhang, Wandong Zheng, Dehui Kong

PII: S0378-7788(17)31709-7
DOI: <http://dx.doi.org/10.1016/j.enbuild.2017.09.022>
Reference: ENB 7941

To appear in: *ENB*

Received date: 14-5-2017
Revised date: 7-9-2017
Accepted date: 10-9-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Numerical study on impact of non-heating surface temperature on the heat output of radiant floor heating system

Xuejing Zheng ^{a,b}, Yong Han ^a, Huan Zhang ^a, Wandong Zheng ^{a*}, Dehui Kong ^a

^b Tianjin Key Lab of Indoor Air Environmental Quality Control, School of Environmental Science and Engineering, Tianjin University, Weijin Road 92#, Nankai District, Tianjin 300072, PR China

Highlights

1. Heat output of radiant floor heating system was compared among different test standards in China, Europe, America and Japan.
2. Impact of the non-heating surface temperature on heat output was studied.
3. A revised formula for heat output of the radiant floor heating system was presented.
