

## Accepted Manuscript

Title: The impact of the temperature dependent thermal conductivity of insulating materials on the effective building envelope performance

Author: Umberto Berardi Matteo Naldi

PII: S0378-7788(16)31454-2  
DOI: <http://dx.doi.org/doi:10.1016/j.enbuild.2017.03.052>  
Reference: ENB 7477

To appear in: *ENB*

Received date: 8-11-2016  
Revised date: 21-3-2017  
Accepted date: 21-3-2017

Please cite this article as: U. Berardi, M. Naldi, The impact of the temperature dependent thermal conductivity of insulating materials on the effective building envelope performance, *Energy and Buildings* (2017), <http://dx.doi.org/10.1016/j.enbuild.2017.03.052>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The impact of the temperature dependent thermal conductivity of insulating materials on the effective building envelope performance

Umberto Berardi, Faculty of Engineering and Architectural Science, 325 Church Street, Ryerson University, Toronto, ON, M5B 2K3, Canada. corresponding author

Matteo Naldi, Faculty of Engineering and Architectural Science, 325 Church Street, Ryerson University, Toronto, ON, M5B 2K3, Canada.
