Title: Novel thermosetting phase change materials with polycarbonatediol based curing agent as supporting skeleton for thermal energy storage

Author: Weibo Kong Yunyun Yang Changlin Zhou Jingxin Lei

PII: S0378-7788(17)31341-5
DOI: <http://dx.doi.org/doi:10.1016/j.enbuild.2017.04.040>
Reference: ENB 7536

To appear in: *ENB*

Received date: 2-12-2016
Revised date: 12-3-2017
Accepted date: 13-4-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Novel thermosetting phase change materials with
polycarbonatediol based curing agent as supporting skeleton
for thermal energy storage**
