This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The scope for investing in improved roof windows was investigated.
- Improvements beyond current best standard practice were studied.
- Improvements preserving daylighting and thermal comfort in the houses were studied.
- The savings in insulation costs by improving the roof windows were identified.
- Improvements in roof window frame and junctions showed the largest potential.
