Title: Indoor Lighting Techniques: an overview of evolution and new trends for energy saving

Author: Francisco G. Montoya Antonio Peña-García Adel Juaidi Francisco Manzano-Agugliaro

PII: S0378-7788(16)31496-7
DOI: <http://dx.doi.org/doi:10.1016/j.enbuild.2017.01.028>
Reference: ENB 7302

To appear in: *ENB*

Received date: 9-11-2016
Revised date: 5-1-2017
Accepted date: 9-1-2017

Please cite this article as: Francisco G. Montoya, Antonio Peña-García, Adel Juaidi, Francisco Manzano-Agugliaro, Indoor Lighting Techniques: an overview of evolution and new trends for energy saving, *Energy & Buildings* (2017), <http://dx.doi.org/10.1016/j.enbuild.2017.01.028>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

1. The raising cost of energy makes indoor lighting techniques as one of the most important contributors for energy saving
2. the history of indoor lighting has impact on energy saving and sustainability
3. indoor lighting techniques with their energy efficiency have opened new perspectives for optimizing the energy conversion
