Title: Heterogeneous Convective Thermal and Airborne Pollutant Removals from a Partial Building Enclosure with a Conducting Baffle: Parametric Investigations and Steady Transition Flow Solutions

Author: Xiu-Hong Ren Jiang-Tao Hu Di Liu Cheng-Wei Liu
Fu-Yun Zhao Han-Qing Wang

PII: S0378-7788(16)31767-4
DOI: <http://dx.doi.org/doi:10.1016/j.enbuild.2016.12.015>
Reference: ENB 7194

To appear in: *ENB*

Received date: 20-4-2016
Revised date: 29-11-2016
Accepted date: 3-12-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Secondly revised manuscript for an archival journal

**Heterogeneous Convective Thermal and Airborne Pollutant Removals from a
Partial Building Enclosure with a Conducting Baffle: Parametric Investigations
and Steady Transition Flow Solutions**
