Energy dissipation during impacts of spheres on plates: Investigation of developing elastic flexural waves

Ronny Boettcher , Alexander Russell , Peter Mueller

PII: S0020-7683(16)30343-2
DOI: [10.1016/j.ijsolstr.2016.11.016](https://doi.org/10.1016/j.ijsolstr.2016.11.016)
Reference: SAS 9369

To appear in: *International Journal of Solids and Structures*

Received date: 20 November 2015
Revised date: 7 October 2016
Accepted date: 15 November 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Derivation of a model for improved energetic analysis by modifying Zener's model
- Modelling the impact process as three distinct phases
- Comprehensive analytical alternative to the model of Koller
- Experimental validation of the proposed model using free fall tests
