

# Accepted Manuscript

A novel structured PdZnAl/Cu fiber catalyst for methanol steam reforming in microreactor

Jinshu Tian, Yuzhi Ke, Guoguo Kong, Mingwu Tan, Yong Wang, Jingdong Lin, Wei Zhou, Shaolong Wan

PII: S0960-1481(17)30448-2  
DOI: 10.1016/j.renene.2017.04.070  
Reference: RENE 8825  
To appear in: *Renewable Energy*  
Received Date: 22 November 2016  
Revised Date: 21 April 2017  
Accepted Date: 27 April 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Highlights

- An innovative structured PdZnAl/Cu fiber catalyst was developed.
- A variety of reaction conditions were tested to achieve the optimized condition.
- The PdZnAl/Cu fiber catalyst showed good stability for MSR after 72 h test.
- The deactivation of the PdZnAl/Cu fiber catalyst was reversible.
