This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Modelling biodiesel production within a regional context- a comparison with RED Benchmark

Implementation of a regionally distributed modelling approach

Spatially and regionally resolved results for regional biodiesel catchments

Comparison with RED typical value for biodiesel production and assessment of mitigation options
