## **Accepted Manuscript**

Title: Current status of biological treatment options in Autism Spectrum Disorder

Authors: Valsamma Eapen, Laura Nicholls, Vanessa Spagnol, Nisha Mathew

PII: \$1876-2018(17)30278-2

DOI: http://dx.doi.org/doi:10.1016/j.ajp.2017.07.025

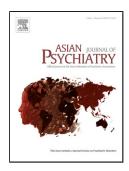

Reference: AJP 1207

To appear in:

Received date: 1-5-2017 Revised date: 8-6-2017 Accepted date: 4-7-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Current status of biological treatment options in Autism Spectrum Disorder

Name of Journal: Asian Journal of Psychiatry

Manuscript Type: Review

**Authors:** 

1. Valsamma Eapen, School of Psychiatry, University of New South Wales, Sydney

NSW, Australia; Academic Unit of Child Psychiatry South West Sydney and Ingham

Institute, Liverpool Hospital, Sydney NSW, Australia

2. Laura Nicholls, School of Psychiatry, University of New South Wales, Sydney NSW,

Australia

3. Vanessa Spagnol, School of Psychiatry, University of New South Wales, Sydney

NSW, Australia

4. Nisha Mathew, School of Psychiatry, University of New South Wales, Sydney NSW,

Australia

Correspondence to: Prof. Valsamma Eapen, MBBS, PhD, FRCPsych, FRANZCP,

Academic Unit of Child Psychiatry, South West Sydney (AUCS), ICAMHS, Mental Health

Centre, L1, Liverpool Hospital, Elizabeth Street, Liverpool, NSW 2170, Sydney, Australia.

Highlights

• Autism is clinically and genetically heterogeneous with several proteins and enzymes

involved

Understanding common molecular pathways and specific disruption in subgroups is

critical

• While several therapeutic agents have been developed, clinical trials have been less

Some of the promising biological models in relation to pharmcotherapeutics are

discussed
