This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A Meta-Analysis of Gaze Differences to Social and Nonsocial Information Between Individuals With and Without Autism

RH = Autism Gaze Meta-Analysis

Thomas W. Frazier, PhD; Mark Strauss, PhD; Eric W. Klingemier, BA; Emily E. Zetzer, MA; Antonio Y. Hardan, MD; Charis Eng, MD, PhD; Eric A. Youngstrom, PhD

Clinical guidance is available at the end of this article.

Supplemental material cited in this article is available online.

Accepted May 5, 2017

Dr. Frazier, Mr. Klingemier, and Ms. Zetzer are with Center for Autism, Cleveland Clinic, Cleveland, OH. Dr. Strauss is with University of Pittsburgh, Pittsburgh, PA. Dr. Hardan is with Stanford University, Stanford, CA. Dr. Eng is with Genomic Medicine Institute, Cleveland Clinic. Dr. Youngstrom is with University of North Carolina at Chapel Hill.

This work was made possible by a generous donation from the Stephan and Allison Cole Family Research Fund. The work was also supported by funding from the Case Western Reserve University International Center for Autism Research and Education (ICARE) and funding for the Developmental Synaptopathies Consortium (U54NS092090). The Developmental Synaptopathies Consortium is part of NCATS Rare Disease Clinical Research Network (RDCRN), an initiative of the Office of Rare Disease Research (ORDR). This consortium is funded through collaboration between NCATS, and the National Institute of Neurological Disorders and Stroke (NINDS) of the National Institutes of Health. The content of this publication is solely the responsibility of the authors and does not necessarily represent the official views of the National Institutes of Health. Dr. Eng is the Sondra J. and Stephen R Hardis Endowed Chair of Cancer Genomic Medicine at the Cleveland Clinic, and an American Cancer Society Clinical Research Professor.

TWF designed the present study. TWF obtained funding to support article review, coding, and analyses. TWF, EWK, and EEZ supervised the article review process. TWF, MSS, AYH, and EAY supervised interpretation of the study. TWF conducted data management and data analyses. All authors contributed to writing and revision.

This study was submitted for presentation to the International Meeting for Autism Research in San Francisco, CA May 10-13, 2017.

Drs. Frazier and Youngstrom served as the statistical experts for this research.

Disclosure: Dr. Frazier has received federal funding or research support from, acted as a consultant to, received travel support from, and/or received a speaker's honorarium from the Cole Family Research Fund, Simons Foundation, Ingalls Foundation, Forest Laboratories, Ecoeos, Curemark, IntegraGen, Kugona LLC, Shire Development, Bristol-Myers Squibb, National Institutes of Health, and the Brain and Behavior Research Foundation. Dr. Hardan has received research funding from Edison Pharmaceuticals and has served as a consultant to Hofman Technologies and Roche. Dr. Youngstrom has received grant or research support from the National Institute of Mental Health and has received internal funds from UNC-Chapel Hill. He has served on the advisory board/DSMB of the International Bipolar Foundation. He has served as a consultant about assessment to Joe Startup Technologies, Otsuka, Pearson Publishing, Western Psychological Services, Janssen, and Lundbeck. Mr. Klingemier has received research support from Kugona LLC. Drs. Strauss and Eng and Ms. Zetzer report no biomedical financial interests or potential conflicts of interest.
