RH: Influences on Autism Symptom Measures

Karoline Alexandra Havdahl, PhD; Vanessa Hus Bal, PhD; Marisela Huerta, PhD; Andrew Pickles, PhD; Anne-Siri Øyen, PhD; Camilla Stoltenberg, PhD; Catherine Lord, PhD; Somer L. Bishop, PhD

Supplemental material cited in this article is available online.

Accepted September 21, 2016

Dr. Havdahl and Øyen are with Norwegian Institute of Public Health and Lovisenberg Hospital, Oslo, Norway. Dr. Stoltenberg is with Norwegian Institute of Public Health, Oslo, Norway and University of Bergen, Norway. Drs. Bal and Bishop are with University of California, San Francisco. Drs. Huerta and Lord are with Weill Cornell Medical College, New York. Dr. Pickles is with King's College London, UK.

The project was supported by grants from the South-Eastern Norway Regional Health Authority (2012101 to Dr. Øyen, fellow: K. Alexandra Havdahl), the National Institute of Child Health and Human Development (NICHD; R01HD065277 to Dr. Bishop), and the National Institute of Mental Health (NIMH; RC1MH089721 and R01MH081873-01A1 to Dr. Lord).

A subset of results was presented at the Gatlinburg Conference on Research and Theory in Intellectual and Developmental Disabilities in New Orleans, LA, on April 2, 2015.

Dr. Pickles served as the statistical expert for this research.

The authors are grateful to all of the participating families, and to the clinical and research staff contributing to the study.

Disclosure: Dr. Pickles has received royalties from Western Psychological Services (WPS) for the publication of diagnostic instruments he has co-authored: the Autism Diagnostic Observation Schedule-Generic (ADOS-G). Dr. Lord has received royalties from Western Psychological Services (WPS) for the publication of diagnostic instruments she has co-authored: the Autism Diagnostic
