This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Neural Biomarker Prospectively Predicts Increases in Anxiety Symptoms in Children After Hurricane Sandy

RH: ERN Predicts Increased Anxiety

Alexandria Meyer, PhD; Carla Kmett Danielson, PhD; Allison P. Danzig, PhD; Vickie Bhatia, PhD; Sarah R. Black, PhD; Evelyn Bromet, PhD; Gabrielle Carlson, MD; Greg Hajcak, PhD; Roman Kotov, PhD; Daniel N. Klein, PhD

Accepted February 27, 2017

Dr. Meyer is with Florida State University, Tallahassee. Dr. Danielson is with Medical University of South Carolina, Charleston. Dr. Danzig is with Kaiser Permanente - South San Francisco. Dr. Bhatia is with Ralph H. Johnson VA Medical Center, Charleston, SC. Dr. Black is with The Ohio State University, Columbus. Drs. Bromet, Carlson, Hajcak, Kotov, and Klein are with Stony Brook University, Stony Brook, NY.

This study was funded by a National Institute of Mental Health (NIMH) grant (R01 MH069942).

This study was presented in a symposium at the Society for Psychophysiological Research (SPR), Minneapolis, 2016.

Drs. Kotov and Klein served as the statistical experts for this research.

Disclosure: Drs. Meyer, Danielson, Danzig, Bhatia, Black, Bromet, Carlson, Hajcak, Kotov, and Klein report no biomedical financial interests or potential conflicts of interest.

Correspondence to Alexandria Meyer, PhD, Department of Psychology, Florida State University 1107 W Call St., Tallahassee, FL 32304; email: meyer@psy.fsu.edu.
