This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Cannabis Use and Disorder From Childhood to Adulthood in a Longitudinal Community Sample With American-Indians

RH: Cannabis Use and Disorder to Age 30

William E. Copeland, PhD; Sherika Hill, PhD; E. Jane Costello, PhD; Lilly Shanahan, PhD

This article is discussed in an editorial by Drs. Nancy Whitesell and Carol Kaufman on page xx.

Supplemental material cited in this article is available online.

Accepted November 21, 2016

Drs. Copeland, Hill, and Costello are with Duke University, Durham, NC. Dr. Shanahan is with University of North Carolina, Chapel Hill.

The work presented here was supported by the National Institute of Mental Health (MH63970, MH63671, MH48085, and MH094605), the National Institute on Drug Abuse (DA/MH11301, DA036523, and DA023026), and the William T. Grant Foundation.

Dr. Copeland had full access to all the data in the study, performed all statistical analyses, and takes responsibility for the integrity of the data and the accuracy of the data analysis.

The authors would like to thank the participants of the Great Smoky Mountains Study and their families for their longstanding involvement in this study.

Disclosure: Dr. Copeland has received research support from the National Institute of Mental Health and the National Institute on Drug Abuse. Dr. Hill has received research support from the National Institute on Drug Abuse. Dr. Costello has received research support from the National Institute of Mental Health and the National Institute on Drug Abuse. She is co-author of the following assessment tools: Child and Adolescent Psychiatric Assessment (CAPA), Young Adult Psychiatric Assessment (YAPA), Child and Adolescent Impact Assessment (CAIA), Child and Adolescent Services Assessment (CASA), and Mood and Feelings Questionnaire (MFQ). No personal income is derived from any of these measures. Dr. Shanahan has received research support from the National Institute on Drug Abuse and the National Institute of Child Health and Development.
