Supplemental material cited in this article is available online.

Accepted July 28, 2016

This article was reviewed under and accepted by deputy editor John T. Walkup, MD.

Dr. Varigonda is with the University of Vermont Medical Center, Burlington. Mr. Jakubovski is with the Yale Child Study Center, New Haven, CT. Dr. Bloch is with the Yale Child Study Center and Yale University.

Dr. Bloch gratefully acknowledges support from the National Institutes of Health (NIH; K23MH091240 and R25MH077823) and from the National Center for Research Resources (UL1 RR024139), a component of NIH, and NIH roadmap for Medical Research. Dr. Bloch also acknowledges support from the National Alliance for Research on Schizophrenia and Depression, the Patterson Foundation, and the Tourette Association of America.

Mr. Jakubovski served as the statistical expert for this research.

The authors would like to thank the Klingenstein Third Generation Foundation for their funding of medical student fellowship programs in child psychiatry at Yale University and Vermont that helped foster the authors' initial meeting and collaboration.

Disclosure: Dr. Bloch has received grant or research support from the National Institutes of Health, the Tourette Association of America, NARSAD, and the Patterson Foundation. He has served as a consultant to Therapix Biosciences and Biohaven Pharmaceuticals. Dr. Varigonda and Mr. Jakubovski report no biomedical financial interests or potential conflicts of interest.

Correspondence to Michael H. Bloch, MD, MS, Child Study Center, Yale University School of Medicine, PO Box 2070900, New Haven, CT 06520; email: michael.bloch@yale.edu.
