This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Exploring Hepsin Functional Genetic Variation Association with Disease Specific Protein Expression in Bipolar Disorder: Applications of a Proteomic Informed Genomic Approach

Malik Nassan, MBBS¹,
 Yun-Fang Jia, Ph.D.²
 Greg Jenkins, M.S.³
 Colin Colby,³
 Scott Feeder,¹
 Doo-Sup Choi Ph.D.²
 Marin Veldic, MD¹
 Susan L. McElroy, MD⁴
 David J. Bond MD, Ph.D.⁵
 Richard Weinshilboum, M.D.⁶
 Joanna M. Biernacka, PhD*^{1,3}
 Mark A. Frye, MD*¹

Authors affiliations:
