Contributors: All authors conceived of and designed the study and interpreted the data. Dr. Han acquired and analyzed the data and drafted the manuscript. All authors revised it critically for important intellectual content.

Human Participation Protection: The data collection protocol of the National Survey on Drug Use and Health was approved by the Institutional Review Board at the RTI International. The survey questionnaires and informed consent procedures received full ethical review and approval from the U.S. Office of Management and Budget.

Disclaimers: The findings and conclusions of this study are those of the authors and do not necessarily reflect the views of the Substance Abuse and Mental Health Services Administration, or the U.S. Department of Health and Human Services.

Conflict of Interest Disclosures: All authors have nothing to disclose related to this article.

Funding/Support: Dr. Olfson's work for this study was supported by NIDA R01 DA019606.

Acknowledgement: The authors would like to thank Wilson M. Compton, MD, MPE of the National Institute of Drug Abuse, the National Institutes of Health for his suggestions on an earlier manuscript.
