Aging and a genetic *KIBRA* polymorphism interactively affect feedback- and observation-based probabilistic classification learning

Nicolas W. Schuck, Jessica R. Petok, Martijn Meeter, Brit-Maren M. Schjeide, Julia Schröder, Lars Bertram, Mark A. Gluck, Shu-Chen Li

PII: S0197-4580(17)30282-8

DOI: [10.1016/j.neurobiolaging.2017.08.026](https://doi.org/10.1016/j.neurobiolaging.2017.08.026)

Reference: NBA 10016

To appear in: *Neurobiology of Aging*

Received Date: 23 July 2015

Revised Date: 3 August 2017

Accepted Date: 27 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Aging and a genetic *KIBRA* polymorphism interactively affect feedback- and**
2 **observation-based probabilistic classification learning**
