Central amygdala activation of extracellular signal-regulated kinase 1 and age-dependent changes in inflammatory pain sensitivity in mice

Katelyn E. Sadler, Nathan M. Gartland, Jane E. Cavanaugh, Benedict J. Kolber

PII: S0197-4580(17)30131-8

DOI: [10.1016/j.neurobiolaging.2017.04.010](https://doi.org/10.1016/j.neurobiolaging.2017.04.010)

Reference: NBA 9905

To appear in: *Neurobiology of Aging*

Received Date: 7 November 2016

Revised Date: 19 March 2017

Accepted Date: 16 April 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
