Age-related differences in the structural complexity of subcortical and ventricular structures

Christopher R. Madan, Elizabeth A. Kensinger

PII: S0197-4580(16)30272-X

DOI: [10.1016/j.neurobiolaging.2016.10.023](https://doi.org/10.1016/j.neurobiolaging.2016.10.023)

Reference: NBA 9762

To appear in: *Neurobiology of Aging*

Received Date: 5 September 2016

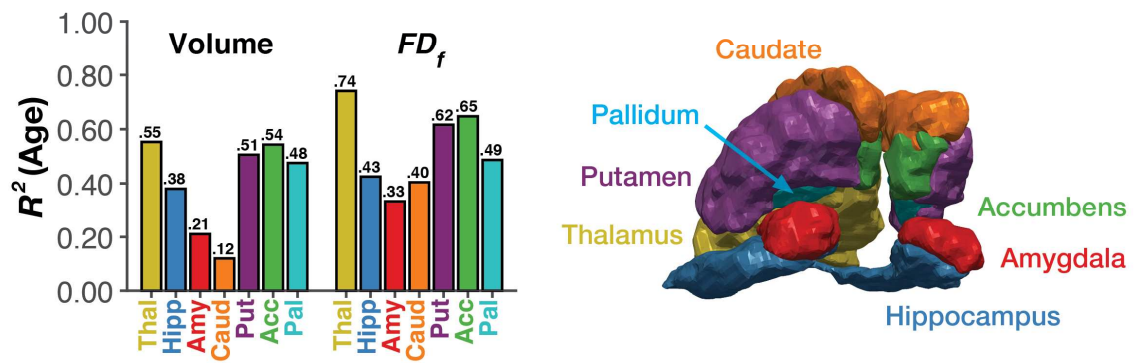

Revised Date: 19 October 2016

Accepted Date: 20 October 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Fractal Dimensionality (FD_f) is more sensitive to age-related differences in subcortical structures than volumetric measures
