This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

### Highlights

- This study manipulated emotional appeals and credibility on an ideological website
- Users' pre-existing attitudes were taken into account
- The influences on users' emotional responses, attitudes and intentions was examined
- Credibility had an effect when it was paired with the other IV's
- Emotional appeals provoke emotionally consistent responses in website viewers
- A 3-way interaction on post attitudes was found
