This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Facebook victimization is a widespread phenomenon among university students.
- Personality variables and risky FB lifestyle were linked to FB victimization.
- Indiscreet FB content, time spent and friends on FB increased FB victimization risk.
- Depression, self-disclosure and indiscreet FB content predicted FB victimization.
