Designing for the Exceptional User: Animal Computer Interaction (ACI)

Sarah E. Ritvo, Robert S. Allison

PII:	S0747-5632(16)30891-3
DOI:	10.1016/j.chb.2016.12.062
Reference:	CHB 4672
To appear in:	*Computers in Human Behavior*
Received Date:	12 May 2016
Revised Date:	09 December 2016
Accepted Date:	28 December 2016

Please cite this article as: Sarah E. Ritvo, Robert S. Allison, Designing for the Exceptional User: Animal Computer Interaction (ACI), *Computers in Human Behavior* (2016), doi: 10.1016/j.chb.2016.12.062

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

- Anthropocentric design of computers is a barrier for animal-computer interaction
- HCI principles apply to animal-computer interaction with important caveats
- ACI design principles should reflect species specific capabilities and limitations
- We explore how animal-centered theory and design may benefit HCI
