This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- Virtual reality rehabilitation (VRR) programs are growing in popularity
- VRR programs are more effective than traditional rehabilitation programs
- Excitement, physical fidelity, and cognitive fidelity may cause VRR program success
- More research is needed to better understand VRR programs
