This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights: “Do you dare to compare?” Associations between maternal social comparisons on social networking sites and parenting, mental health, and romantic relationship outcomes

- Social comparisons on social media are common
- Such comparisons were associated with negative outcomes for mothers.
- These extended to the parenting, relationship, and mental health domains
- Implications include helping mothers become critical thinkers on social media
