This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Estimates the pass-through rate of state budget cuts to tuition revenue at public schools.
- Identification strategy accounts for institution-specific factors as well as endogenous state budget choices.
- I find that for every \$1,000 per student state budget cut, the average student pays \$257 more in tuition/fees.
- This rate has increased over time, with a post-2000 pass-through rate of \$318 per student for a \$1,000 cut.
