This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Teacher turnover negatively affects achievement despite adverse selection of leavers.
- Experience loss and grade reassignment account for the negative turnover effects.
- Negative turnover effects are concentrated in lower-achievement schools
- First-year teachers who move to other schools are not adversely selected on average.
