This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We study salary compression across 15 academic disciplines over the past 22 years.
- Salary compression is present in accounting, economics, and finance.
- Salary compression is increasing in these three disciplines over time.
- Salary compression increases as competing nonacademic salaries increase.
- The modified MLE method we develop and use in this paper would be useful in a variety of settings.
