This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Do special needs students affect the academic achievement of their classmates?
- Three independent identification approaches are used to answer this question.
- The results consistently show no significant effects on regular education students.
- No differential effects are found for different types of special needs.
- No evidence for heterogeneous effects for high and low achieving regular students.
