This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- Computer use in college classrooms is commonplace.
- We use a quasi-experimental design to identify the effects of laptop use in college classrooms.
- We find that computer use has a significant negative effect on student grades.
- The negative effects of computer use are concentrated among males and low performing students.
