<sup>3</sup>CORRESPONDENCE TO: Manuel Giner, M.D., Ph.D., Professor of Surgery, Department of Surgery, School of Medicine, Complutense University of Madrid, 28040-Madrid, Spain

**ACKNOWLEDGEMENTS**

The authors express their gratitude to Mr. Hector Montoya for his help in art resources development, to experts that gave their opinions and helped to improve the videogame, to the personnel at the surgical blocks of Hospital “Clínico San Carlos” of Madrid (Spain), where the game’s imaging resources were obtained, and to students that voluntarily participated in our RCT.

**FUNDING**

Supported by Grants of the Complutense University of Madrid (PIMCDs 102-2012, 101-2013, 161-2014, 241-2015 and 195-2016)

The funders had no role in the study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication.
