A Class of Hybrid Multilayer Perceptrons for Software Development Effort Estimation Problems

Ricardo de A. Araújo, Adriano L.I. Oliveira, Silvio Meira

PII: S0957-4174(17)30526-2  
DOI: [10.1016/j.eswa.2017.07.050](https://doi.org/10.1016/j.eswa.2017.07.050)  
Reference: ESWA 11466

To appear in: *Expert Systems With Applications*

Received date: 31 January 2017  
Revised date: 27 July 2017  
Accepted date: 28 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- A class of multilayer neural network with hybrid processing units
- A gradient-based learning process to design the proposed model
- An experimental analysis using relevant datasets of software development effort estimation
