This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- \bullet Dynamic Fitness Measure Genetic Programming is proposed.
- The approach uses a different fitness measure at each generation.
- A genetic algorithm is used to induce the sequence of fitness measures.
- The approach outperforms standard genetic programming on benchmark tasks.
- Future work will apply the approach to more complex real-world problems.
