Energy consumption forecasting based on Elman neural networks with evolutive optimization

L.G.B. Ruiz , R. Rueda , M.P. Cuéllar , M.C. Pegalajar

PII: S0957-4174(17)30656-5
DOI: [10.1016/j.eswa.2017.09.059](https://doi.org/10.1016/j.eswa.2017.09.059)
Reference: ESWA 11580

To appear in: *Expert Systems With Applications*

Received date: 12 July 2017
Revised date: 6 September 2017
Accepted date: 23 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- One new method is proposed based on recurrent neural networks.
- The method addresses the problem of energy consumption forecasting.
- The method is evaluated using data from public buildings of University of Granada.
