Random forests-based extreme learning machine ensemble for multi-regime time series prediction

Lin Lin , Fang Wang , Xiaolong Xie

PII: S0957-4174(17)30248-8
DOI: [10.1016/j.eswa.2017.04.013](https://doi.org/10.1016/j.eswa.2017.04.013)
Reference: ESWA 11246

To appear in: *Expert Systems With Applications*

Received date: 10 January 2016
Revised date: 3 April 2017
Accepted date: 4 April 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The random forests-based extreme learning machine ensemble model is proposed
- The model can be accurate, stable and efficient in time series prediction
- The multi-regime approach is used to handle multi-regime time series
- The model and the approach are combined to predict multi-regime time series
