## Accepted Manuscript

Multi-class sentiment classification: The experimental comparisons of feature selection and machine learning algorithms

Yang Liu, Jian-Wu Bi, Zhi-Ping Fan

PII:S0957-4174(17)30195-1DOI:10.1016/j.eswa.2017.03.042Reference:ESWA 11200

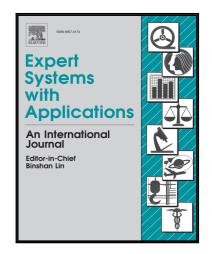

To appear in:

Expert Systems With Applications

Received date:6 October 2016Revised date:20 March 2017

Please cite this article as: Yang Liu, Jian-Wu Bi, Zhi-Ping Fan, Multi-class sentiment classification: The experimental comparisons of feature selection and machine learning algorithms, *Expert Systems With Applications* (2017), doi: 10.1016/j.eswa.2017.03.042

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- A framework for multi-class sentiment classification is proposed.
- A total of 3600 comparative experiments are conducted.
- Performances of different feature selection/machine learning algorithms are compared.
- The results are valuable for further studies on multi-class sentiment classification.
