Data Mining and Machine Learning for Identifying Sweet Spots in Shale Reservoirs

Pejman Tahmasebi , Farzam Javadpour , Muhammad Sahimi

PII: S0957-4174(17)30483-9
DOI: [10.1016/j.eswa.2017.07.015](https://doi.org/10.1016/j.eswa.2017.07.015)
Reference: ESWA 11431

To appear in: *Expert Systems With Applications*

Received date: 12 February 2017
Revised date: 20 June 2017
Accepted date: 11 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- An automatic procedure that can use most of the available information
- The proposed method can be updated rapidly when new data are available.
- Data can be integrated with different scales and lengths
- Sweet-spot location can be identified using all available data
