To appear in: Expert Systems With Applications

Received date:8 January 2016Revised date:12 May 2017Accepted date:1 June 2017

Please cite this article as: Jian Ding Tan, Mahidzal Dahari, Siaw Paw Koh, Ying Ying Koay, Issa Ahmed Abed, A New Experiential Learning Electromagnetism-Like Mechanism for Numerical Optimization, *Expert Systems With Applications* (2017), doi: 10.1016/j.eswa.2017.06.002

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- An improved Electromagnetism-Like mechanism algorithm is proposed.
- An experiential learning search mechanism replaces the traditional local search loop.
- This mechanism analyses results from previous search and adjust accordingly.
- Our approach is simple yet effective in solving global optimization problems.
