This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We propose two methods for integrating feature selection in sentiment analysis.
- Based on these methods a new ranking feature vector is created.
- Results show important potential in facilitating the sentiment classification.
