This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

HIGHLIGHT

- SAM provides enhanced visual aids for representing the many-to-many association rules in large transaction data.
- The performance of SAM can be numerically evaluated by using $S2C$ measure.
- SAM enables users to conveniently identify the interesting areas that might contain interesting association rules.
- SAMs with higher $S2C$ values are more useful for visual exploration of association rules.
