Experimental study and Random Forest prediction model of
microbiome cell surface hydrophobicity

Yong Liu , Shaoxun Tang , Carlos Fernandez-Lozano ,
Cristian R Munteanu , Alejandro Pazos , Yi-zun Yu , Zhiliang Tan ,
Humberto González-Díaz

PII: S0957-4174(16)30601-7
DOI: [10.1016/j.eswa.2016.10.058](https://doi.org/10.1016/j.eswa.2016.10.058)
Reference: ESWA 10963

To appear in: *Expert Systems With Applications*

Received date: 14 July 2016
Revised date: 27 October 2016
Accepted date: 27 October 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Experimental study and prediction model of microbiome cell surface hydrophobicity
- Expected Measurement Moving Average – Machine Learning model to predict CSH
- Random Forest prediction model with 12 features and test R-squared of 0.992
