This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Multi-criteria decision support for eco-friendly routing solutions.
- Emission minimization and reverse logistics.
- Efficient unification of multi-objective and multi-attribute VRPs.
- Efficient handling of non-uniform traffic conditions.
- Demonstrated utility in real-world VRP manifestations.
