This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Introduce Structural Semantic Annotation to improve English to Malay EBMT System.
- Emphasize meaning structure preservation in the automated translation process.
- Translation examples representation is extended with Structural Semantic Annotation.
- Resolved the fragmentation and inconsistency issues in EBMT system.
- The result of the English to Malay automated translation is improved.
