Project Resources Scheduling and Leveling Using Multi-Attribute Decision Models: Models Implementation and Case Study

Ch. Markou , G.K. Koulinas , A.P. Vavatsikos

PII: S0957-4174(17)30044-1
DOI: [10.1016/j.eswa.2017.01.035](https://doi.org/10.1016/j.eswa.2017.01.035)
Reference: ESWA 11083

To appear in: *Expert Systems With Applications*

Received date: 19 September 2016
Revised date: 16 December 2016
Accepted date: 25 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Project resources leveling and scheduling under time and cost constraints.
- Prioritization rules examination as decision making problem.
- Standard optimization techniques and Multi-Attribute decision models combination.
- Project duration and resources moments compensation to select the most suitable schedule.
